

# Reference - Sublime Text Shortcuts

Assignment

26

OCT

STATUS

## OVERVIEW

All reference assignments are just here for you to come back to and reference as needed. I would suggest not marking this as complete until you are very comfortable with the material contained within. Just make sure to mark this assignment as completed before the end of the class. As always, contact me if you have any questions or concerns!

### Sublime Text Keyboard Shortcuts

- **Cmd + n** New file
- **Ctrl + t** Next tab
- **Ctrl + shift + t** Previous tab
- **Cmd + d** Select the next occurrence of the selected word -- With this you can very quickly change multiple words at once.
- **Ctrl + Cmd + F** Toggle Fullscreen
- **Ctrl + Cmd + Shift + F** Toggle Distraction Free -- This is a GREAT feature
- **Cmd + F** Find in file
- **Cmd + Shift + F** Find and or replace in all files
- **Cmd + P** Goto Anything -- This command allows you to quickly go to any file in your project.
- **Cmd + Shift + P** Command Palette -- From here you can control Sublime, such as installing or uninstalling plugins on the fly
- **Cmd + /** Toggle Comment -- Allows you to quickly uncomment or comment out a line, or multiple lines.
- **Cmd + Shift + D** - Duplicate the line your cursor is on
- **Cmd + `** Display console panel, helpful for installing certain plugins
- **Cmd + Space** Auto complete the current selected snippet
- **More shortcuts can be found here** (<http://www.cheatography.com/gelicia/cheat-sheets/sublime-text-2-shortcuts-verbose-mac/>)

### Getting started with sublime

Sublime has a ton of great features, here is an hour long video that goes over just about all of them. The video covers using these features with a fair amount of Python code, but they will work just as well for HTML, CSS, and JavaScript.
